

"Leading the World in Affordable, Effective Portable Foam Systems"

## 4515 or 4515A SUPPLY LINE HOLDER, 1.5" HOSE

The Scotty 4515 Supply Line Holder is a device designed to secure a 1.5" fire hose to a portable water tank in the field. It consists of a specially fabricated clamp system made from an extruded aluminum clamp and a stainless steel bolt with knob. The 4515 comes with a Scotty 4085 Double Female, 1.5" NPSH/NPSH Connector, the 4515A comes with a Scotty 4086 Double Female, 1.5" NPSH/NHT Connector. The user attaches the supply hose end to the threaded end of the unit. The user then places the clamp over the support frame of the wall of the portable tank and tightens the clamp to the tank wall. The unit is very light weight and durable. A version for 2.5" hose will be available, stock code 4525 (NPSH) or 4525A (NHT).

The photo below shows a Supply Line Holder with a 4088 Double Swivel attached (4088 not included).
